Subject: Revised draft BP Whiting update for the web page -- please review and let me know if you approve or have changes. Thanks.

April 4, 2014

The U.S. Environmental Protection Agency and the U.S. Coast Guard were on site today to examine the shoreline near an oil spill into Lake Michigan that BP reported on March 24. They found no evidence of oil on the beach or in the water. The cleanup is complete. EPA and the Coast Guard plan to perform a follow up inspection of the lake and shoreline this summer.
